

Welcome to the 11th Emergency Abdominal Surgery Course. The first was held in Letterkenny Donegal in May 2012 so returning home for this course is very special. More recent courses were in Coimbra Portugal, Torreveija Spain and Athens. This course builds on previous success and is further enhanced by an international faculty who are leaders in Emergency Surgery.

EASC has evolved into a world leading course in Emergency Abdominal Surgery. EASC curriculum focuses on the acute abdomen, in a multidisciplinary shared learning approach. It will bring you a level of discussion you have not heard before and enhance your ability on-duty as a surgeon, gastroenterologist or radiologist; either as a trainee or a specialist. This course is about decision making in patients and common emergencies. The course is endorsed by many societies.

Course Goals

Understanding the natural history of key emergency surgery presentations, with emphasis on decision making and operative/intervention tips and traps to optimise outcome. This coupled with a manual containing lectures and the latest literature abstracts will ensure your patients are getting optimal outcomes.

Who should attend ?-

If you treat or manage a patient with an acute abdomen this course is a must for you!

Donegal Clinical Research Academy would like to thank the Colleges, Trade and RCSI in particular for their support and the sponsors without whom we could not share this course with you.. This 11th Course will have one of the greatest Faculties ever for one Surgical Course- places are limited. A faculty of over 30 world leaders from 13 countries!
